

# Sterile Fill Finish and Formulation

## Best of Breed Services for Best in Class Products

Cytovance® Biologics is a leading US-based biopharmaceutical Contract Development and Manufacturing Organization (CDMO) bringing 30 years of innovation and ingenuity to international customers looking for unrivaled large molecule biologics and APIs support from protein to patient. We specialize in **microbial and mammalian expressed proteins** used to produce monoclonal and fragment antibodies, bispecifics, enzymes, fusion proteins, vaccines, cytokines, insulin, bivalent VLPs, and other complex molecules. While Team Cytovance delivers proven experience in earlier stages of integrated development and cGMP manufacturing activities, we partner with fellow CDMO, **Alcami Corporation**, to optimize formulation and sterile fill-finish operations for customers. This long-standing relationship is built on our shared dedication to robust quality management and reliable coordination of respective manufacturing processes to streamline the transfer of bulk drug substances into finished drug products.

**“We are proud to work alongside the team at Cytovance Biologics to deliver unrivaled expertise in high-quality fill-finish operations...Our combined 77 years of serving the life science industry promise our shared customers the utmost commitment to pharmacological product quality, ultimately getting new drug products to patients faster.”**  
- William Humphries, Alcami CEO

### THE CAPABILITIES YOU GAIN:

With the addition of Alcami to our ecosystem, Cytovance customers benefit from a vetted partner responsible for the success of **over 50 commercial products** and:

- 2 US-based facilities supporting clinical and commercial production.
- 5 filling lines with isolator technology, in-line weight checks, and 100% single-use disposable systems.
- Specialized expertise in liquid and lyophilized vial and syringe products.
- On-site formulation, packaging, and labeling support.
- End-to-end light and temperature control and monitoring.

### OUR PARTNERSHIP:

From research to cGMP manufacturing, our teams provide you with ingenuity every step of the way.
